- lower germ/odour formation
- in **HACCP** colours (cross-contamination)
- food-safe, **FDA** and **BfR** approved
- temp. resistant up to 180 °C

### Efficient

- reduces running costs and work steps
- no costs for disposable bases
- increases chopping board lifespan
- v-shape for narrow counter
- non-slip pot stand up to 180°
- grease/moisture-repellent
- durable and chemical-resistant
- 5,000 rinses (80°C) tested

### Ergonomic

- the right work height through stacking
- easy to lift the board
- quick to hand
- easy to clean, handy

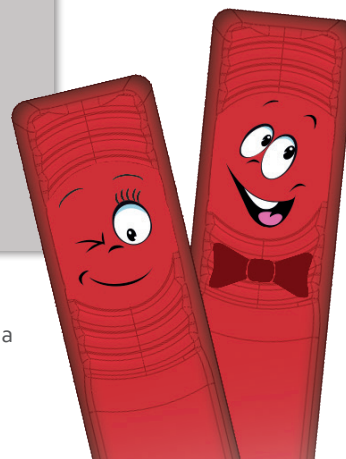

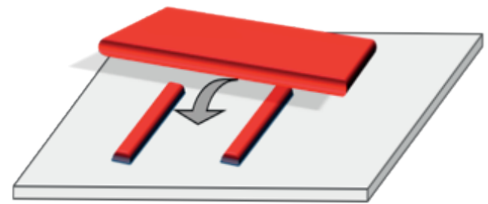

### Patented

- developed and produced in Austria
- join-free material (one piece)
- length 26.9cm; width 3.9cm; height 1.2cm

### The science of colour in the fight against bacterial spread

By clearly allocating one colour to one area, the risk of cross-contamination is considerably reduced.

- Red for red meat
- Blue for fish and sea food
- Yellow for poultry
- Green for fruit and vegetables
- White for baked goods
- Brown for cooked food

**100% effect**  
in perfectly clean kitchen
